

ISO MANAGEMENT SYSTEMS COURSE BROCHURE

1. Environmental Management System (EMS) Lead Auditor Course – ISO14001

No matter the size or industry of the organization, environmental management should be a top priority. Global governments, businesses, and the general public should be most concerned about issues like climate change, ozone layer depletion, atmospheric pollution, soil and groundwater contamination, and the disposal of hazardous wastes. Guidelines for establishing policies and procedures that will improve environmental performance are provided by ISO 14001. You can maintain and control environmental impacts and legal compliance with the aid of these policies.

Who should Attend

- Auditors seeking to conduct audits for Environmental Management System against the requirements of ISO14001
- Managers or consultants who want to learn how to conduct an audit of an environmental management system
- People in charge of maintaining EMS requirements compliance
- environmental management specialists
- Professionals and experts seeking to prepare for an Environmental Management System audit

Course Objectives

- Understand how an Environmental Management System (EMS) based on ISO 14001 functions.
- Understand how ISO 14001, ISO 14040, and other standards and regulatory frameworks are related.
- Understand the responsibilities of an auditor in planning, directing, and following up on an ISO 19011 management system audit.
- Discover how to interpret the ISO 14001 requirements in the context of an EMS audit.
- Develop the skills necessary to be an auditor, including the ability to plan audits, lead audit teams, write audit reports, and follow up on audits in accordance with ISO 19011.

Agenda

Day 1: Introduction to the Environmental Management System (EMS) and ISO 14001		Day 2: Audit principles and the preparation for and initiation of an audit	
Day 3: On-site audit activities	Day 4: Closing of the audit	Day 5: Course revision & Certification exam	

2. Information Security Management System (ISMS) Lead Auditor Course – ISO27001

Organizations seeking to establish, implement, maintain, and continually improve an information security management system must adhere to the requirements set forth by ISO27001. This framework acts as a roadmap for routinely assessing the security of your data, which will demonstrate dependability and enhance the offerings of your company.

Organizations are able to identify and address information security risks by implementing an information security management system that satisfies all ISO27001 requirements.

Who Should Attend

- Auditors seeking to conduct Information Security Management System audits
- Managers or consultants who want to learn how to audit an information security management system
- Those in charge of upholding adherence to Information Security Management System requirements
- Information security management specialists

Course Objectives

- Determine whether the ISMS complies with ISO/IEC 27001 requirements using the basic audit concepts and principles.
- Manage ISO27001 audit program
- Plan and conduct ISO27001 compliance audit in accordance with the requirements of ISO17021-1, the principles of ISO 19011, and other auditing best practices.
- Interpret the ISO27001 requirements for an ISMS

Day 1: Introduction to the Information Security Management system (ISMS) and ISO27001		Day 2: Audit principles and the preparation for and initiation of an audit	
Day 3: On-site audit activities	Day 4: Closing of the audit	Day 5: Course revision & Certification exam	

Agenda

3. Occupational Health and Safety Management System (OHSMS) Lead Auditor Course – ISO45001

OHSMS - ISO 45001 replaces OHSAS 18001 making it the current ISO standard for auditing occupational Health and Safety Management System. The ISO 45001 Lead Auditor training course aids in the development of the necessary skill set to carry out occupational health and safety management system (OH&S MS) audits.
